Product Specification

Ingredients biscuits:

wheat flour, sugar, hydrogenated vegetable oil, cocoa powder, invert syrup, glucose, malt extract, milk powder, ammonium bicarbonate(e503), sodium bicarbonate (e500), salt, vanillin, soya lecithin(e322), enzyme protease, water.

Biscuits:

Biscuit is a delicious meal that has a high variety. Biscuits come in different sizes and tastes, sometimes you can eat it as a breakfast with milk or chocolate milk.

Biscuits like cookies and cakes are made of flour with milk and sugar or loaf powder, butter with different recipes, it can be served by tea or as a snack in work.

Biscuit is a word added to the English language in the 14 century, in time it expanded in other languages with the synonym words. This word comes from French, which made is from two words "bis" and "coctus" which means double cooked. As we continue we will examine how this word appeared and its place in other languages.

Meaning of biscuit:

Finding the origin of a word in the lexicon is easy, when we search in the oxford lexicon for "biscuit" meaning, at first we see two explanations, what is called biscuit in British and what it applied in America.

They know themselves as stylists and have special traditions in serving biscuits with tea. Even the special biscuits that get served for the queen and we know them as biscotti, have their own taste and world.

Wafer:

The wafer is a very thin, crispy, sweet, and dry kind of biscuit. These biscuits have much use, but what is common is a specific wafer product. Means a small kind of cookie that sandwich layers of cream in wafers plates. Wafers are being used to decor ice cream. As the matter of fact, a cone that is used in cone ice creams and sandwich ice creams is one of the wafer kinds. Wafer's surface is mostly reticular, something like a waffle.

The first reason to make wafers was to have a new snack to use with their evening tea or coffee. For example French's to have a better taste wafer in medieval, so they start to use honey instead of sugar, or using different oils and changing their amount, made wafers more crispy so children would like these tasty snacks even more. Christians from the east of Europe made wafers for Christmas in the shape of boys and mothers. White square wafers are known as Christmas wafers.in medieval and the beginning of renascence, wafers were an inseparable part of official parties and assemblies. But the wafers that we talked about and the one now are a little different.

For baking wafers in past centuries, there was a special tool like pincers. This device is made of two long handles that had small round plates attached to it. These plates have been hinged at the bottom of each other, infect they acted as a case for the wafer. They would spread the paste between these plates and push them against each other, then hold them on fire with handless.

There is no specific genesis point for the wafer. But its first manifestation was in the streets of Paris in the 14th century. Italians and duchess have some of the oldest wafers. In Italy, they called it pizzelle, which means round and flat. Pizzelles were mostly decor with historian and family shapes.
